

WOMEN'S SAFETY APP

Usability Testing & Analysis Report

Submitted By: Divyanshi Patil

Tool Used: Figma

Project Type: UI/UX Design Project

Introduction

The Women's Safety App is designed to provide quick access to emergency assistance and safety-related features. The objective of this usability testing was to evaluate the application's ease of use, navigation, and overall user experience.

Objectives

- Evaluate usability and navigation
- Collect user feedback
- Analyze user experience
- Identify future improvements

Testing Methodology

The prototype was tested by users and showcased during a hackathon. Participants explored the application and provided feedback regarding usability, design, and accessibility.

Features Evaluated

- Emergency SOS Button
- Emergency Contacts
- Incident Reporting
- Navigation Flow
- Overall UI/UX Design

User Feedback & Findings

Users responded positively to the application. Most participants found the interface clean, easy to understand, and simple to navigate.

Key Observations

- Interface is user-friendly and visually appealing.
- Important features are easy to locate.
- Navigation is smooth and intuitive.
- The app addresses a real-world safety concern effectively.

Analysis

Ease of Navigation: Excellent

User Interface Design: Excellent

Feature Accessibility: Very Good

Overall User Experience: Excellent

Future Enhancements

- Live Location Sharing
- Emergency Alerts
- Integration with Emergency Services
- Multi-Language Support

Conclusion

Based on usability testing and hackathon feedback, the Women's Safety App successfully met its usability goals. Users found the application intuitive, accessible, and practical, demonstrating strong potential for future development.
